Taken Snapshot of database-1

us-east-1.console.aws.amazon.com/rds/home?region=us-east-1#snapshots-list:

Aurora and RDS > Snapshots

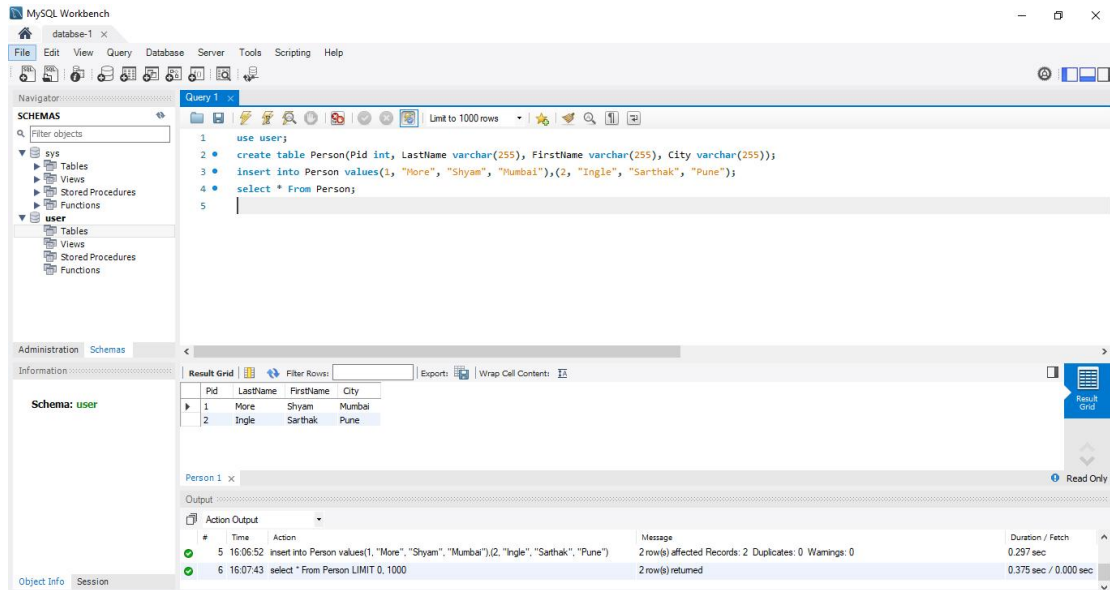

Successfully created snapshot db1-snapshot. View details

Snapshots Manual System Shared with me Public Backup service Exports in Amazon S3

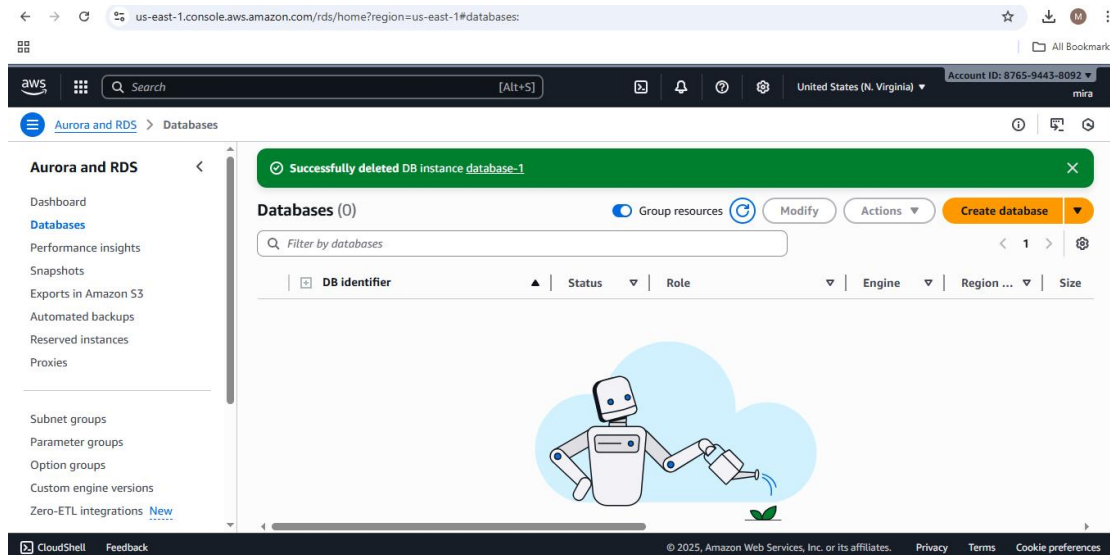

Manual snapshots (1) Actions Take snapshot

Filter by manual snapshots

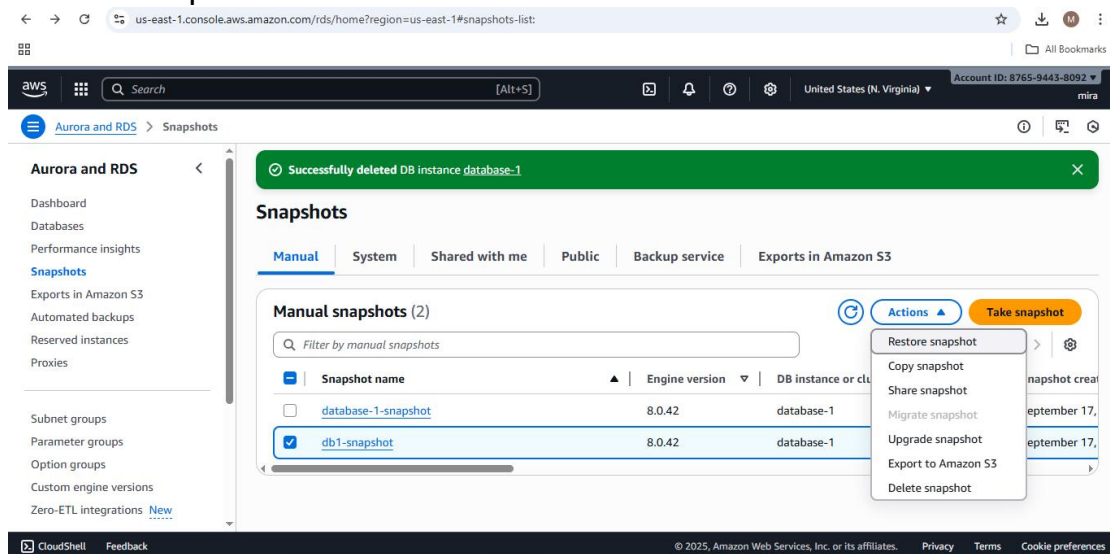

Snapshot name	Engine version	DB instance or cluster	Snapshot creation time
db1-snapshot	8.0.42	database-1	September 17, 2025

Master Database deleted

Restore Snapshot

Snapshot Restored

The screenshot shows the AWS Management Console for the 'Aurora and RDS' section. A green notification banner at the top states: 'Snapshot restored successfully. Restoring db1-snapshot to database-1 was successful.' Below this, the 'Databases (1)' section is visible. A table lists the database instance:

DB identifier	Status	Role	Engine	Region	Size
database-1	Available	Instance	MySQL Co...	us-east-1b	db.t3.mic

Task2

Connecting via EC2 Server

The screenshot shows the AWS Management Console for the 'EC2' section. The 'Instances (1/1)' section displays a table with one instance:

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability
rds-ec2	i-0334ae69a68b37c21	Running	t3.micro	Initializing	View alarms +	us-east-1b

Below the table, the 'Details' tab for instance 'i-0334ae69a68b37c21 (rds-ec2)' is selected. The 'Instance summary' section shows:

- Instance ID: i-0334ae69a68b37c21
- Public IPv4 address: 44.220.80.203 | [open address](#)
- Private IPv4 addresses: 172.31.7.156

The screenshot shows a terminal window with the following output:

```
Your MySQL connection id is 23
Server version: 8.0.42 Source distribution
Copyright (c) 2000, 2018, Oracle, MariaDB Corporation Ab and others.
Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
